### Description

- A cot designed to transport bodies up to 1,000 lbs.
- Independent leg design allows the front legs to fold/unfold, while the rear legs (operator's end) remain engaged to carry the cot's weight into the vehicle.
- Additional design versatility allows use of the loading wheels to move cot in the vertical position.
- Dual release handles for both front and back legs allow for one-person loading and unloading.
- Allows for easy maneuverability in tight areas and down stairs.
