Description

This cold room is suitable for the optimisation of corner spaces in big kitchens, food and flower shops. The short side of Penta is 790 mm only and it has been studied to meet the depth of refrigerated working tables, wall cabinets and others. Penta is supplied with a blind door, glass doors are also available upon request. Penta can be supplied with a condensing unit at positive or negative temperatures. The internal space is fully useable, upon request it can be fitted with shelving, ceiling steel frames or hanging wall bars.
