Description

The Model 600040S Covered Cadaver Carrier Scissor With Rollers allows for the concealed removal and transport of a deceased patient from the hospital room to the morgue. The carrier gives the illusion of being a standard empty gurney while hiding the cadaver beneath a specially fabricated top cover. A roller top frame allows easy transfer of body tray from carrier to lift or carrier to refrigerator. The unit features stainless steel construction and adjustable elevation via foot pedal operated hydraulics.
