- **Tall Filler Spout for Embalming Machine**

The tall faucet is designed for your embalming machine to fit under the spout. By using the master mixing valve, you can supply the desired temperature to the tank of your machine. The spout is easily turned out of the way when not in use.

- **Master Mixing Valves**

Water temperature to the table rinse and tall faucet are easily controlled with the master mixing valves. Simply adjust lever until the desired temperature is achieved.

- **Easy Installation**

The entire unit is pre-assembled and pre plumbed for easy installation. Simply drop into the cutout in your countertop and connect the utility lines. The base plate is fabricated of heavy gauge stainless steel. Will install in counters as shallow as 18in/45cm deep.
